About the CTOAM Precision Second Opinion

The most thorough and personalized second opinion in cancer care.

The CTOAM Precision Cancer Medicine Second Opinion provides you with a comprehensive review of the most important details of your current cancer care and what is possible and how to get it.

Our team will review the most current details of your case and identify the most beneficial treatment options and how to access them, and you'll discuss those findings in a one hour zoom consultation with our Director, Alexander Rolland.

This zoom call is recorded for you to review or share with family and care advocates.

Within 24 hours of your consultation, you'll receive a written summary of your consultation and Alex's recommendations for your treatment with additional references and resources so that you can take action on those recommendations immediately.

In anticipation of your consult with Alex and to ensure you get the most out of it, please complete the attached brief medical history form, and forward us as many of the following documents as you have access to. Please note – our team can collect your medical records for you if that is easier for you – just let us know and I will send you the release form to allow us to assist in this way.

1. Your most recent Blood test results;
2. Your most recent imaging scan results;
3. Your most recent pathology report;
4. The last 3 doctor's visits notes.

We will ensure Alex and his team receive them prior to your consultation so they can make your consultation as personalized to you as possible.

The fee for this consultation is \$947 CAD + GST, payable via bank transfer or credit card prior to your consultation (an invoice will be forwarded to you when you register).
